

On Oct 20, 2015 Ms. Helen Corral-Bonner and 5 students attended the National Congress of American Indians Conference held in San Diego. This was as a special request from Milo Booth National FEMA Tribal Affairs Advisor to present the Native Earthquake Drill posters created by Sherman students during the Emergency Preparedness Session. The FEMA HQ National Tribal Affairs Advisor, Milo Booth and Heather L. Duschell, FEMA Region IX Tribal Liaison discussed the opportunities for Indian Country's youth to promote preparedness for generations to come and how the posters can be the catalyst to highlight the great work students are doing to help prepare and promote within Indian Country and have them available on the Ready Indian Country's website.

Robert L. Holden Deputy Director of the NCAI congratulated and praised the students' work and plans to display the posters back in the NCAI D.C. office. **SEE Posters here:** [Native California](#) and [Native America](#)
